The Links, Incorporated's Position Statement On COVID-19 Vaccines

The Links, Incorporated supports the administration of the COVID-19 vaccines. Our members and the communities we serve are encouraged to take the COVID-19 vaccines offered in approved health systems and with any necessary parameters. The National COVID-19 Task Force and Links leadership have had the opportunity to participate in briefings from FDA Commissioner Dr. Stephen M. Hahn, Pfizer, and Dr. Kizzmekia Corbett — the African American NIH scientist responsible for the Moderna vaccine development. Based on these briefings, engagement in other vaccine task forces, and the understanding from these sessions that all scientific standards have been met and the vaccine will save lives, particularly in those populations and communities most vulnerable, The Links, Incorporated provides its support.
